General Contractor/Builder: \_\_\_\_\_

The State of Georgia has adopted as State Law the 1995 edition of the Georgia State Energy Code for Buildings. This code regulates the design, erection, construction, alteration and renovation of buildings. The designer/builder shall comply with the standards of this Code which are applicable. This code contains requirements for energy conservation and is effective as of April 1, 1996. Compliance with this code by designers and builders is mandatory.

I do certify that the above permitted structure shall be built in accordance with the 1995 Georgia State Energy Code for Residential 1 & 2 Family Dwelling Buildings using one of the following methods:
