

Addendum #6

2020 Mill, Patch and Resurface Project of Various Streets
Within the City of Duluth

Issued September 25, 2020

Questions submitted and responses

Q. The information on Ennfield Way states that there is 277 tons of 2" – 19mm, but there is not a pay item for 19mm on the Base Schedule. Please clarify.

A. Yes, the tonnage is correct. There should have been a pay item. Please just write in your amount for 277 tons of 19mm – unit price and total and add it to the grand total at the bottom.

Q. The information on Rogers Cove states that there is a Patch area at 3" – 180 tons. The alternate project of Rogers Cove/Grizzly Lane Bid Schedule Quantity for patching doesn't account for these tons. Is this correct? Please clarify.

A. Yes, the patch is required and the tonnage is correct. Please just add a line to the bid schedule with the tons and unit price and total and add it to the grand total at the bottom.
